DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 8, 17 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Togashi et al.

Regarding claim 1, Togashi et al., discloses an electronic capacitor probe device with features of the claimed invention including a connector block (element 2) situated between the capacitor plates (elements 2 and 3) and holding the capacitor plates together in a predetermined mutual orientation, the connector block including a plurality of rod members (elements 6) protruding from opposite connector block sides and extending into a respective capacitor plate (see, for example, figure 4).

Regarding claim 8, the connector block is disposed between peripheral portions of the capacitor plates.

Regarding claims 17, and 20 the capacitor is formed by formation of plurality of holes in each plate (see figure 5), where the plurality of the rods (elements 6) of the connector block (element 2) protrude, making a complementary geometry.

Application/Control Number: 10/729,600

Art Unit: 2855

3. Claims 2-7, 9-12, and 18-29 are objected to as being dependent upon a rejected base

claim, but would be allowable if rewritten in independent form including all of the limitations of

the base claim and any intervening claims.

4. Claims 13-16 allowed basically for the provision of an embedded sensor in the target

region, which is partially composed of rubber in combination with other limitation of said

claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The

examiner should be directed to Max H. Noori whose telephone number is (3/1) 2/2-2183. examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 PM.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0956. The fax phone

number for the organization where this application or proceeding is assigned is 703-872-9306.

The central fax number is (703) 827-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR

applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
